To Verborgene\_Empfaenger; ☆

Dear colleagues, collaborators and friends,

(some of you have the info, so no news for you today)  
after a long and hilly journey I am happy to announce that I received a definite offer for a Professorship position from TU Dresden, meaning I will be moving there gradually soon.

The job includes a Professorship in the Institute for Theoretical Physics and comes jointly with a bridging Chair for Complex Systems and Networks at the (Excellence) Center for Advancing Electronics Dresden (cfaed). In the latter, my task is to substantially contribute to the Biological Systems path, developing insights about biological systems and transferring them to engineering applications; so in total the job is offering the right mix between theoretical physics, biology and engineering.

Next month I actually should hold a piece of paper certifying the above...

I thank you all for your long-standing support to this point!

Best wishes, have a happy [long] weekend,

Marc

To Me ★

Dear Mrs Maoutsa

I am happy to accept you as a PhD student for project A06.

I will check next week with our admin people about the details for hiring you at TU Berlin and let you know as possible about the procedure.

Looking forward to seeing you next time in Berlin

Best wishes

Manfred Opper
